

# LOTGUARD CASE STUDY

Park 'N' Fly

MOBILE SURVEILLANCE FOR PARKING LOT SECURITY

## CLIENT USE CASE

Parking lot protection required for increased security of vehicles

Enhancing safety and peace of mind for customers

Monitoring the parking lot 24/7 with remote access

Constant threat of theft and vandalism to cars left unattended in parking lots

Increasing awareness of mobile video surveillance to deter potential theft threats

Evidential footage with ability to be viewed, recorded, and captured easily for review and liability cases

## OBJECTIVE

To implement a proactive security surveillance system for the company's parking lots at multiple locations. A primary goal is to minimize the risk of theft and vandalism to unattended vehicles left on site and ensure overall security for customers' peace of mind.

# SOLUTION

Park'n Fly needed security to protect customers' vehicles left in parking lots, LotGuard is a valuable solution to act as a deterrent in helping prevent thefts and vandalism of vehicles onsite.

LotGuard surveillance trailers offer a cost-effective alternative. By eliminating the need for security guards, fixed cameras or upfront investments.

LotGuard surveillance trailers are equipped with high-quality cameras and 24/7 monitoring capabilities, which is crucial for deterring theft and vandalism which could occur at any time, day or night.

# RESULTS

Park 'N Fly has used various security measures at our 30+ locations in the US. Some have worked, some have not. I reached out to the LotGuard team at Wireless CCTV, and have deployed multiple units at several airport locations, with great success to keep vandals and car theft at bay.

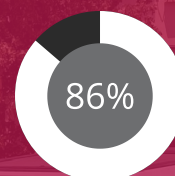

The Park 'N Fly corporate security team highly recommends the LotGuard mobile surveillance units for anyone looking to curb their vandalism, thefts and create an overall security peace of mind for their customers.
